HERBAGE ABSTRACTS and FIELD CROP ABSTRACTS

These two quarterly journals, prepared by the Commonwealth Bureau of Pastures and Field Crops, Hurley, England, are composed of abstracts in English from the world's current scientific literature. *Herbage Abstracts* deals with grasslands and fodder crops while *Field Crop Abstracts* covers the annual field crops. Both journals include review articles, as well as informative abstracts dealing with crop husbandry, varieties, crop botany, the control of diseases, pests and weeds, and sections devoted to books and reports.

For those engaged in agricultural research, or in advising agriculturists, these two journals offer a ready means for keeping in touch with current progress in agricultural research and developments without the labour of scrutinizing the mass of agricultural publications now appearing throughout the world in many languages. The annual subject and author indexes, to *Herbage Abstracts* and *Field Crop Abstracts*, dating from 1930 and 1948, respectively, form a valuable source of reference to past work.

Obtainable from: Commonwealth Agricultural Bureaux, Central Sales Branch, Farnham Royal, Bucks, England. Price of each journal (with annual indexes), 50 shillings per annum, post free.
